

CNC Lathe Operators Needed  
1st and 2nd shift positions available.

Work in a brand new facility with a growing company.  
Centerline is a contract job shop serving multiple industries  
We are looking for dedicated-reliable people with setup and job shop experience  
This is not a button pusher job, you will be setting tools, making fixtures, programming,  
taking a job from start to finish.

#### Requirements

- Ability to operate multi axis CNC Turning Machines
- Ability to program multi axis CNC Turning Machines
- Live tooling lathe experience a plus
- Knowledgeable in tooling offsets and cutting tool setup
- Ability to operate manual Lathe if required
- Knowledgeable on Mazak controls (will train the right G-Code person)
- Experience in low volume and high volume environment
- Proficient in both setup and operation
- Ability to operate multiple CNC Lathes as production demands
- Knowledgeable in materials, speed/feed parameters, advanced cutting tools and their application. Willing to work with tooling suppliers on new cutting tool technology
- Ability to make fixtures and tooling as needed
- Setup reduction and cycle reduction time experience is preferred
- Ability to maintain equipment including lubrication level, light machine repair, coolant levels, coolant concentration, etc.
- Willing to work overtime including some weekends as required
- Practice safe work practices including use of safety glasses, side shields, steel toe shoes, safe lifting methods, and safe machine use methods

#### Experience

- 2 to 5 years experience in CNC Turning
- Will consider recent machine tool tech program graduates
- Mazak experience a plus, but will train the right G-Code person on the control
- Conversational programming experience a plus

Package includes: pay based on experience, health insurance, 401K match, holidays and vacation
